

(C) 12. 執行下列VB程式片段後，請問A(3, 1) = ? (A)4 (B)3 (C)2 (D)0。 統測

```

Dim A (5, 5) As Integer
Dim I , J As Integer
For I = 0 to 5
    For J = 0 to 5
        If (I > J) Then
            A(I, J) = A(I - 1, J)
        ElseIf (I = J) Then
            A(I, J) = I + J
        Else
            A(I, J) = I * J
        End If
    Next J
Next I
    
```

有三種模式:

I > J 就上面那個

I = J 就相加

I < J 就相乘

那 A(3,1)就是 A(2,1)其實就是 A(1,1)
