課本 p.65

優甲乙丙丁

範例1 判斷成績等級（請注意以下2段程式碼中的條件設定順序）。

內文範例 "ch1-3q.sln"、

```
grade = 82
Select Case grade
    Case Is >= 90
        MsgBox("優")
    Case Is >= 80
        MsgBox("甲")
    Case Is >= 70
        MsgBox("乙")
    Case Is >= 60
        MsgBox("丙")
    Case Else
        MsgBox("丁")
End Select
```

《執行結果》

```
Public Class Form1
```

```
    Dim grade As Single
```

```
    Private Sub Button1_Click(ByVal sender As System.Object, ByVal e As System.EventArgs) Handles
```

```
Button1.Click
```

```
        grade = Val(TextBox1.Text)
```

```
        Select Case grade
```

```
            Case Is >= 90
```

```
                Label3.Text = "優"
```

```
            Case Is >= 80
```

```
                Label3.Text = "甲"
```

```
            Case Is >= 70
```

```
                Label3.Text = "乙"
```

```
            Case Is >= 60
```

```
                Label3.Text = "丙"
```

```
            Case Else
```

```
                Label3.Text = "丁"
```

```
        End Select
```

```
    End Sub
```

End Class
